

Accessories and finishing touches.

> Accessories. It's your choice.

All of our pools can be personalized with a vast range of accessories and finishing touches to make it completely exclusive. Linings and colors for every taste, suggestive external and internal ladders, borders and flooring in natural reconstructed stone, intelligent lighting systems. In addition, items for relaxing, play, safety and much more. **Here are some examples:**

- > **PVC Linings** to line and waterproof your pool. The linings give a unique elegance to your pool and iridescent reflections to the water.
- > **Acrylic Ladder:** a refined, high-quality accessory that allows convenient access to your pool. There are many possibilities to personalize the form, size and color. Equipped with openings that can be integrated with a hydro massage system. The ladder must be incorporated in the design phase of the project, various options can be selected.
- > **Pool borders and flooring:** in natural reconstructed stone, the esthetic features and characteristics of the original rock are preserved, and have the added benefit of heat-reflection traits: the result guarantees a pleasing texture while avoiding unpleasant burns. Solutions that blend esthetics, safety, strength and practicality.
- > **Illumination and Music:** create the lighting effects you desire – from suggestive atmosphere to bright, entertaining lighting – by choosing from the various types and intensities available. You can also connect your stereo or MP3 to our complete illumination systems to give a touch of refined elegance to your pool.
- > **Hydrotherapy:** equipped with a hydrotherapy system, your Busatta pool can become an authentic wellness center. Functions for localized massages stimulate lymph-draining action that helps tone and slim your body.
- > **Upstream Swimming:** the upstream swimming unit can be easily installed along the edge of any pool for those who want to stay in shape by swimming against the current. No modifications to the pool structure are required. Perfect for athletes.
- > **Covers:** various solutions are available: **roll-up covers**, characterized by a sophisticated but simple mechanism; **Isothermal covers**, light and resistant, they can be used manually or automatically to cover the pool during the season when it is in use; **Winter covers**, safeguards the water so that it can be re-used for the next season.
- > **Heating:** for around-the-year use of the pool. Various possibilities include: furnace heaters, heat exchangers, electric heaters, heat pumps. Each one fitted to the specific needs and dimensions of the pool.
- > **Dehumidification.** The sophisticated choice to enjoy an indoor pool requires solutions able to eliminate inconveniences such as condensation, fogged windows and unwanted efflorescence. A complete range of quiet, compact dehumidifiers are available for the various types and shapes of pools.
- > **Shower:** an unavoidable poolside accessory. Various solutions in terms of materials, form and color.
- > **Maintenance:** automatic cleaning and maintenance are indispensable for the complete enjoyment of the pool. Our **automatic cleaners** are authentic robots, easy to care for and capable of cleaning your pool without supervision. Equipped with sensors, they detect the size and shape of the pool.
- > **Safety:** enjoy your pool as a relaxing and pleasant area, but also as a safe and protected area. We have a variety of safety systems that range from the more traditional mechanical devices to the modern technological versions. **ATTENTION: THESE SAFETY DEVICES DO NOT SUBSTITUTE the careful supervision of children under any circumstances.**

> Italian ingenuity. > Global Resources.

Contemporanea Line > Elite Line

> Our Company.

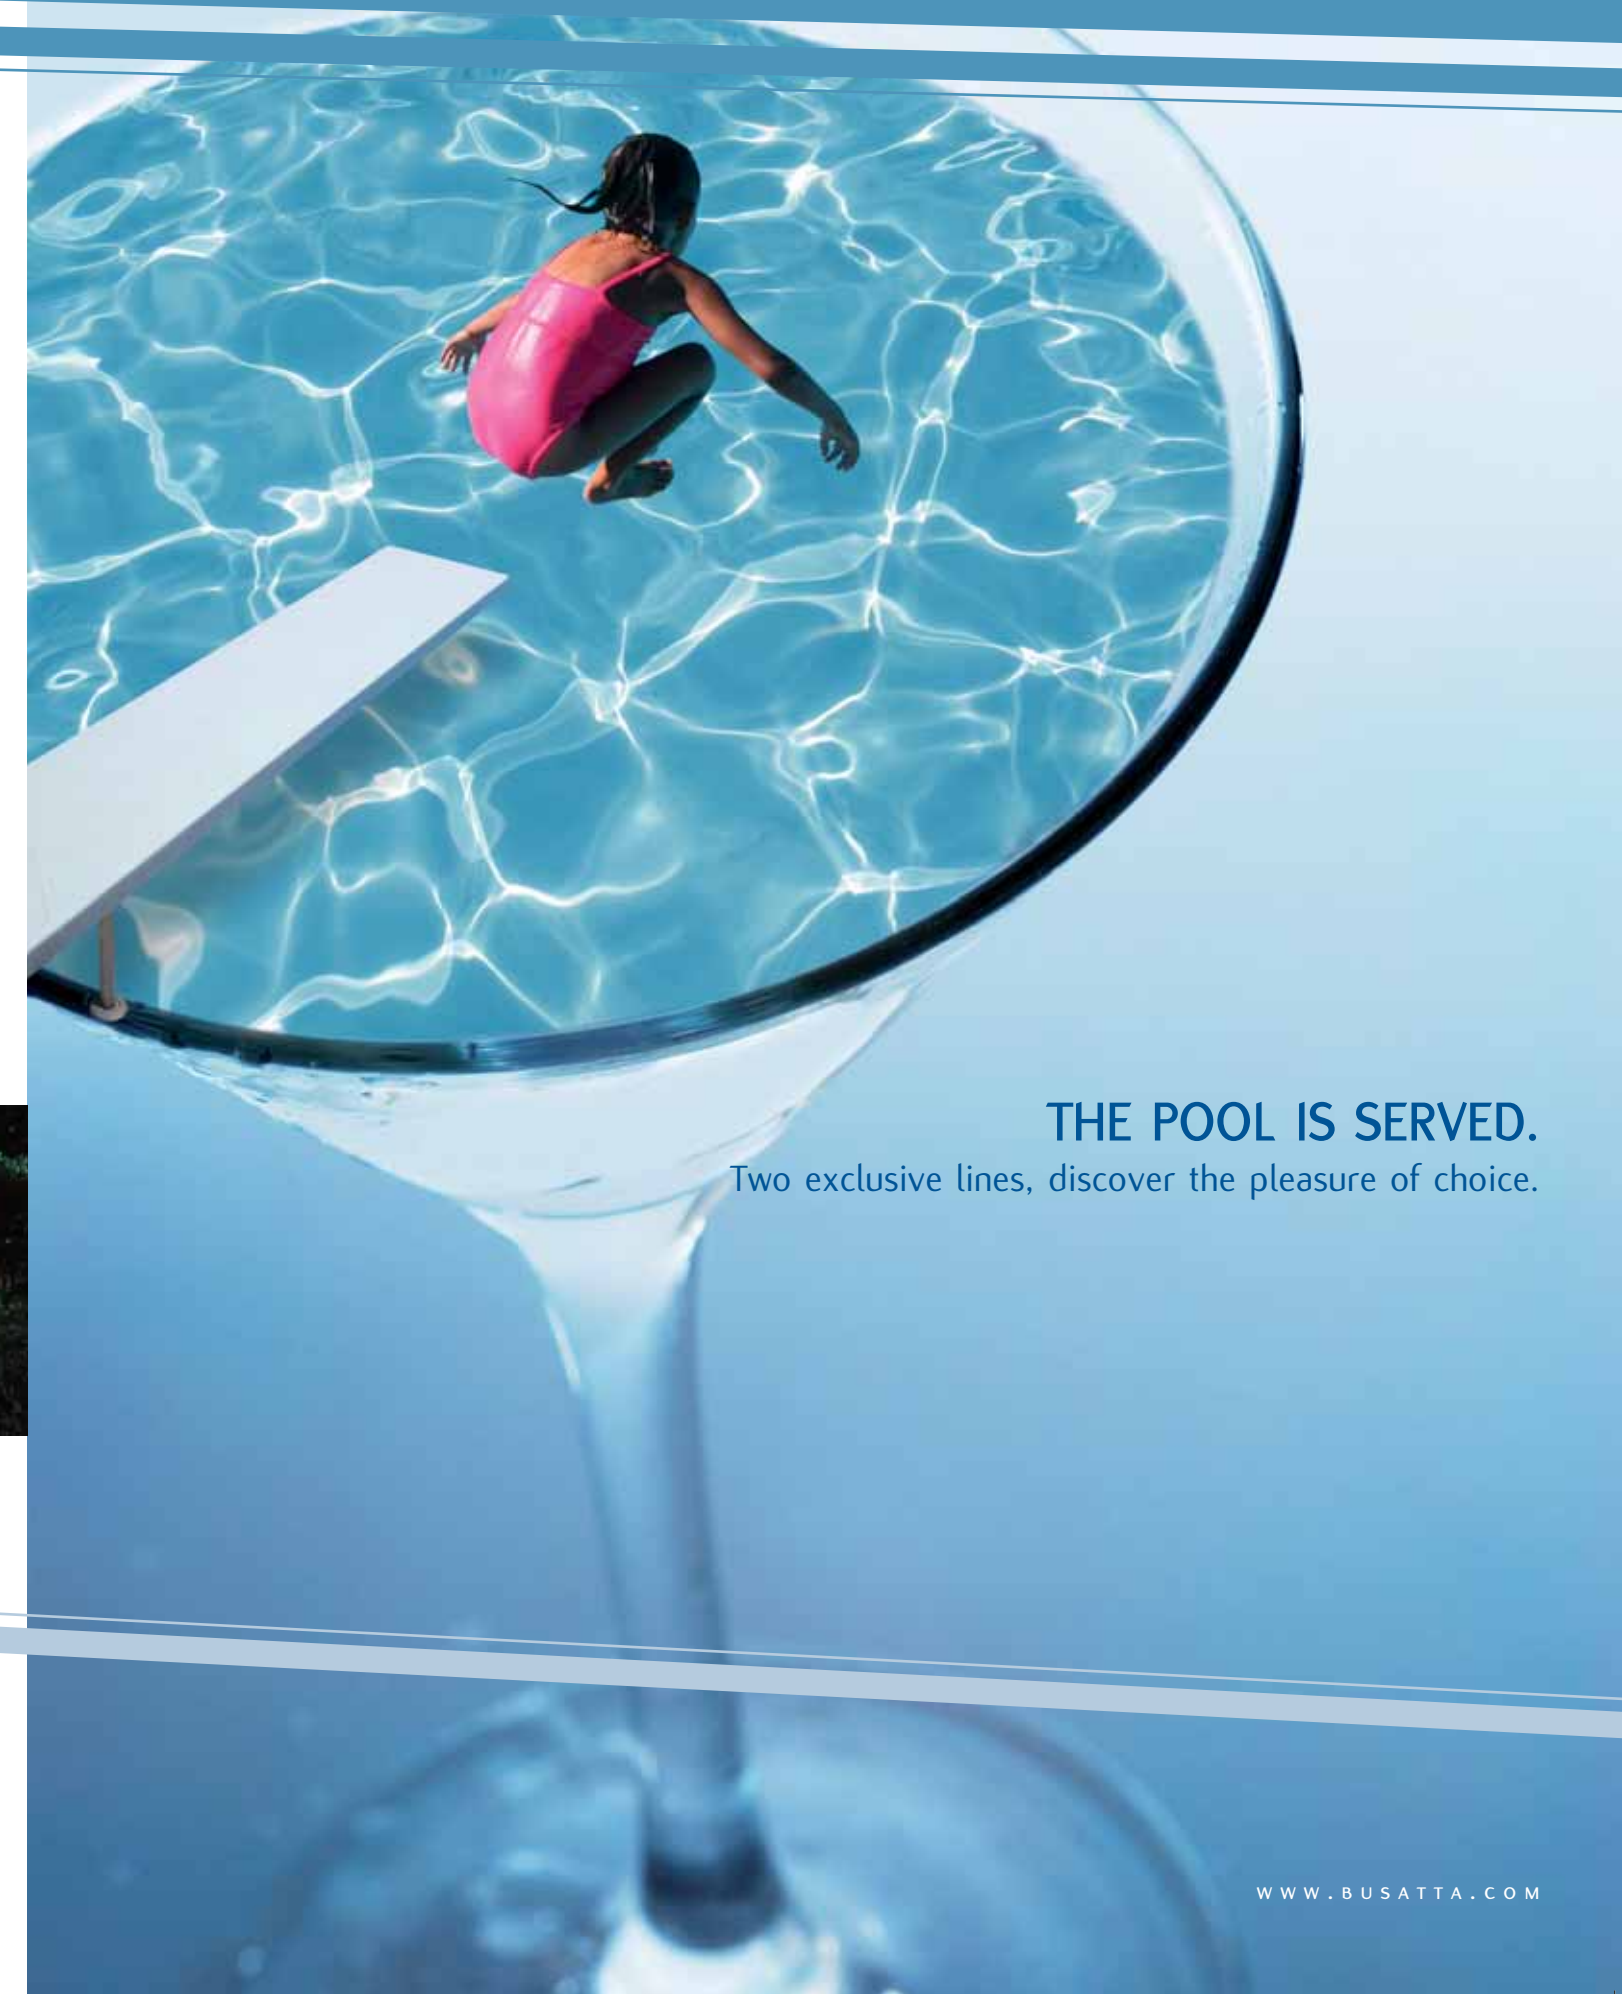

Busatta Piscine is a historical Italian business founded in 1988; it was the first company in Italy to manufacture residential pools, revolutionizing the industry with its innovative system of ribbed steel pool-wall panels, an exclusive technology that is patent protected internationally. **The headquarters are located in Ivrea**, in the province of Turin and in the heart of the Canavese valleys at the foot of the magnificent Alps. This is the location of the production facilities, management, administration, sales and marketing offices, shipping and logistics departments, as well as the warehouses that store products ready for immediate delivery all over Italy. In addition, all of the research, design and post-sales activities are managed and coordinated at this location. In 2005, the all-Italian ingenuity of Busatta Piscine joined forces with the SCP Group, first ranked distributor in the world of products and accessories dedicated to pools and the world of wellbeing, adding global resources and becoming **the Italian center of excellence of the SCP Group.** This resulting synergy combines the quality and creativity of "Made in Italy" with an international vision and the capability of a global 360° offering.

> From the designing stage to your pool!

Busatta Piscine is proud to offer the services of our Design office and it's engineers and architects who are specialists in the field; they will study the best pool solution for your needs. A service that is fundamental and unique for our clients.

> Sales Network: a team at the service of our clients.

The team in Ivrea works side by side with its qualified, selected sales network: there are over 50 exclusive distributors in Italy, experts in providing products, accessories and comprehensive assistance from the first on-site visit to the installation to post sales support. All with the same single, splendid goal: to give form and life to your every desire and need.

THE POOL IS SERVED.

Two exclusive lines, discover the pleasure of choice.

Via Novara, 9 - 10015 San Bernardo d'Ivrea (TO)
Tel. 0039-0125 2361 - Fax 0039-0125-236250 - www.busatta.com - info@busatta.com

The choice is yours: no limits, no doubts, no contest.

Rely on a brand-name leader. Beware of imitations.

>Contemporanea, Vacation Breezes. >Elite, Water Jewels.

Busatta Piscine is synonymous with competence, professionalism, experience and qualified service, whether you choose the standard skimmer technology of the Contemporanea Line or the spillway technology of the Elite Line. We are here to serve you.

> Contemporanea by Busatta Piscine. Beauty is possible.

This line is divided in two sections: **Contemporanea Superior** with 15 standard profiles that allow you to create more than 1000 models. In addition, thanks to the flexibility of the Busatta Piscine panels, the form and dimensions have no restrictions: traditional rectangular or free-form.

Contemporanea Light is a "light" solution in terms of price, but is complete with all the functions currently available on the market. Rich in style, it doesn't give up the combination of high profile design and guaranteed, patented quality. Three models are available: **Light Classic**, **Light Fantasy**, **Light Relax**.

- > The ribbed steel panels that make up the structure are secured to one another with **double bolting**. **No welding is used** in order to avoid weak points and those dangerous oxidation seams that can appear in traditional pools.
- > **The pool can be installed in any type of terrain**, with a notable reduction in the construction work required. Designed in harmony with the yard without the usual limitations of size or shape means that quick installation times and reduced expenses are easily attained.
- > In addition to the panel in N125 steel, this is the only pool that, has a **second wall panel in reinforced polyester** that serves to line the panels and to bear the PVC liner and thermal insulation. This is an exclusive and internationally patented production method.
- > All of the components and particulars of the Busatta pools are manufactured in series, guaranteeing an **excellent quality/price ratio**.

> Technology. That is what makes the difference.

Busatta pools are born from leading-edge industrial processes and are synonymous with quality and exclusivity.

- > The structure of the pool, made of steel panels with horizontal ribbing that reinforce the structural resistance, allowing it to bear up to 10 times the pressure of the surrounding earth. **All of our pools are completely self-supporting.**
- > The panels **can bear up to 20.000 kg/m²**, comparable to the strength of a 45 cm. reinforced cement wall, despite it's smaller dimensions, lighter weight and surprising flexibility.
- > Thanks to the process of zinc heat-coating (applying melted zinc to the panel at a temperature of 450° C.), tests in saline fog have shown that **this structure guarantees an active underground protection for up to 100 years**. The zinc galvanizing process is not simply a coating or electrolytic protection of the zinc to the panel, but a true bonding between the iron and the zinc. Though this process, a layer of zinc is formed with a thickness of 114 to 126 microns and 750 grams per square meter. An exceptional protection, without equal in Europe.

> Elite by Busatta Piscine.

One of a kind, created just for you.

The highest level of technology available, interprets the concept of a spillway pool in an original and suggestive way, allowing exclusive solutions like waterfall and beach effects.

The **Elite Line** is characterized by it's innovative accessories, it's original and exclusive design. A unique line, fascinating and elegant, that offers absolute freedom: there are no rules regarding dimension, form, color or location in relationship to your domestic space.

Three collections:

Infinity, the best choice for those who love elegant and essential lines. The spillway is located only on one part of the perimeter to create a suggestive "horizon effect".

Liberty, represents full freedom of choice in terms of shapes and contours. The grid perimeter spillway design makes for an exclusive, patented Busatta pool.

Naturali, becomes part of it's surroundings; no border, no grid. An authentic gem set in the midst of nature. Just water in perfect harmony with it's surroundings.

> The heart of the pool.

Busatta Piscine relies entirely on Hayward components for it's pool equipment technology – in addition to being a world leader in it's sector, Hayward is synonymous with quality, constant technological innovation and durability. Hayward technology constitutes the perfect blend of performance, safety, silence, quality and savings.

Certified in accordance with European standards, it has also been certified by TUV, an independent, globally recognized leader in testing and certification: this is one more guarantee of the quality of the Hayward solutions.

> The building phase

The Busatta Piscine Dealer will identify the area that is most suitable for the installation of the pool: help with the organizational aspects, and accompany you through each phase of the installation step by step. The most important phases are:

> The outline of the pool on the ground

> Excavation

> Assembly of the structure

> Pouring the concrete floor, installation of accessories and filter system

> Applying the PVC lining

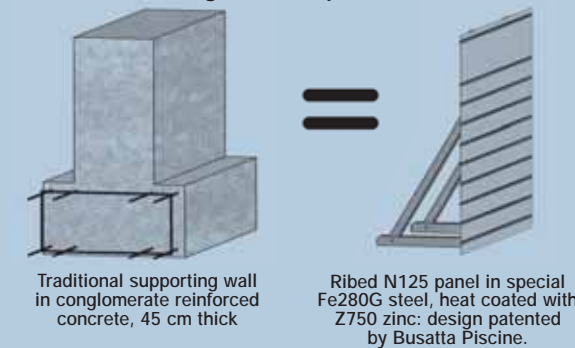

> Filling the pool with water

> It's time to dive in!

Comparative Diagram of the structural strength of the pool walls.

> Guarantee.

Busatta pools and their components are covered by an exclusive guarantee.

The **Written Guarantee Booklet** unites all of the warranty certificates: from the Busatta pool structure to each single authorized accessory. These documents are a safeguard for you and the demonstration of our reliability.
